

## Capitol Environmental Services, Inc Remediation Services – Project Examples

Project Name	Customer	State	Project Size	Materials Managed	Project Description
Annapolis Naval Communications Center IRP	Shaw Environmental & Infrastructure, Inc.	MD	\$250K	Non-hazardous lead contaminated soil (3,000 tons)	Provided the transportation and disposal of non-hazardous, low level lead contaminated soil to a secure, permitted disposal facility. Lead contaminated soil was generated by sand blasting operations related to radio tower maintenance.
Bethpage Naval Weapons Center IRP	Tetra Tech Nus, Inc	NY	\$250K	Contaminated soil, debris and water generated by investigation and remediation.	Provide ongoing support for all off-site transfers of regulated materials generated by site investigation and clean-up activities. Materials include soil, debris and wastewater in both drummed and bulk quantities.
Eaker Air Force Base IRP	Versar, Inc.	AR	\$250K	Non-hazardous petroleum contaminated soil.	Transportation and disposal of 3000 tons on non-hazardous, petroleum contaminated soil.
Fort Chaffee BRAC	Shaw Environmental & Infrastructure, Inc.	AR	\$200K	Hazardous Waste Soil contaminated with Chlordane	Transportation and disposal of 1000 tons of soil contaminated with Chlordane.
Griffis Air Force Base	Shaw Environmental & Infrastructure, Inc.	NY	\$1.7 M	Non-hazardous, low-level Polychlorinated Biphenyls (PCB) contaminated soils.	Provided the transportation and disposal of non-hazardous, low level Polychlorinated Biphenyls (PCB) contaminated soils.
Langley Air Force Base	Shaw Environmental & Infrastructure, Inc.	VA	\$500K	Debris and soil contaminated with petroleum hydrocarbons and lead.	Remedial action to remove a former wastewater treatment system including the buildings, piping, process equipment, and surrounding soils impacted by operations.

## Capitol Environmental Services, Inc Remediation Services – Project Examples

Project Name	Customer	State	Project Size	Materials Managed	Project Description
Red River Army Depot BRAC	Ace Constructors, Inc.	TX	\$1.5 M	Petroleum Contaminated Soil, Cadmium Contaminated Soil (D006), Spent Carbon	Job required the removal of 6,000 tons of TPH contaminated soil and 12,000 tons of Cadmium contaminated sludge that was classified as hazardous waste.
Region I - Boston Central Artery	Earth Tech, Inc.	MA	N/A	Hazardous and non-hazardous wastes excavated during tunnel construction.	This project involved the on-site coordination of transposition and disposal services for non-hazardous and hazardous wastes excavated during the construction of tunnel under the metropolitan Boston area.
Region II - Scorpio Scrap Steel Superfund Site	WRS Infrastructure & Environment, Inc.	PR	\$750K	Chromium contaminated soil and debris.	On-Site stabilization of contaminated material and transfer to local Subtitle D secured landfill.
Region II - Vega Baja Superfund Site	WRS Infrastructure & Environment, Inc.	PR	\$400K	Lead contaminated soil	Provided 710 tons of kiln dust to perform on-site stabilization of lead contaminated soils, on-site management, and the transportation and disposal of 8,000 tons of non-hazardous stabilized material at a secure Subtitle D landfill.
Region III - Ryeland Road Site	Earth Tech, Inc.	PA	\$100K	Non-Hazardous Contaminated Soil	Transportation and disposal of 4500 tons of non-hazardous, non-regulated contaminated soil from the site to a soil recycling facility.
Region VI - Marco Refinery Superfund Site	Shaw Environmental & Infrastructure, Inc.	KS	>\$3 M	Non-hazardous wastes	Project involved the coordination of transportation services for non-hazardous wastes excavated during the remediation of an EPA Superfund Site.
Roosevelt Roads Naval Station IRP	Shaw Environmental & Infrastructure, Inc.	PR	\$100K	PCB contaminated soil and PCB contaminated oil	Provided the transportation and disposal of non-hazardous, low level Polychlorinated Biphenyls (PCB) contaminated soils, sludges, and oils from the island of Puerto Rico to a regulated disposal facility in the continental United States.

## Capitol Environmental Services, Inc Remediation Services – Project Examples

Project Name	Customer	State	Project Size	Materials Managed	Project Description
Seneca Army Depot BRAC	Weston Solutions	NY	\$1.7 M	Non-hazardous, petroleum-contaminated soils	This project consisted of the transportation of 62,000 tons of contaminated soil.
St Marks Refinery Superfund Site	Earth Tech, Inc.	FL	\$1.0M	Dioxin contaminated wastewater and sludge material.	Transportation and disposal of 600,000 gallons of oil, 200,000 gallons of dioxin contaminated wastewater and 600 tons of dioxin contaminated sludge material.
Sunflower Army Ammunition Plant IRP	Environmental Chemical Corporation (ECC)	KS	\$750K	Non-hazardous contaminated soil	US ACE required the off-site transfer and disposal of 12,000 tons of contaminated soil and debris.
White Oak Naval Weapons Center IRP	Shaw Environmental & Infrastructure, Inc.	MD	\$250K	Non-hazardous soil contaminated with low-level PCBs	Provided the transportation and disposal of non-hazardous, low level Polychlorinated Biphenyls (PCB) contaminated soils generated at a former Naval Weapons Center in White Oak, Maryland to a regulated disposal facility in the United States.
World Bank Headquarters	CH2MHill	DC	\$425K	Petroleum contaminated soil and groundwater.	Petroleum contaminated site in NW Washington DC, consisting of fuel oil contamination in the soil and ground water as a result of leaking underground storage tanks. Remedial efforts were coordinated in conjunction with the excavation phase of a large building construction project.
